

SUPRAJA PATURI

Platform Engineering Lead (Cloud Tooling)

📞 +91-8500909271 ✉ supripaturi@gmail.com 🔗 [linkedin.com/in/supraja-paturi](https://www.linkedin.com/in/supraja-paturi)

Summary

Platform / DevOps Engineer with 5+ years of experience building scalable CI/CD platforms, cloud infrastructure, and developer self-service tooling. Currently leading Cloud Tooling initiatives focused on platform standardization, automation, and developer experience improvements on OpenShift.

Technical Skills

Cloud & Platform Engineering: GCP, OpenShift, Kubernetes, Docker, Terraform, Red Hat OpenShift Dev Spaces, Red Hat Developer Hub (Backstage), Artifact Hub, Astronomer (Airflow), Elastic Stack (ELK)

CI/CD & Automation: OpenShift Pipelines, Tekton, Jenkins, GitHub Actions, GitOps, ArgoCD, Cloud Build

Programming: Python, Java, Go, Bash, PowerShell, SQL, Spring Boot, REST APIs

Observability & Monitoring: Prometheus, Grafana, Elastic Stack, OpenTelemetry

Experience

Cloud Tooling Lead

Ford Motor Company

Apr 2025 – Present

Platform Engineering / DevOps

- Leading CI/CD platform engineering and developer self-service initiatives on OpenShift and GCP platforms.
- Driving platform standardization through reusable platform components, deployment automation, and self-service CI/CD pipelines.
- Built Kubernetes-based platform solutions with deployment controllers, integrated monitoring, logging, alerting, and OpenTelemetry-based observability.
- Developed reusable CI/CD pipelines and enabled platform integrations through Artifact Hub and Developer Hub to support centralized onboarding, self-service deployments, and improved developer experience.
- Partnering with security and artifact management teams to implement keyless authentication for CI/CD pipelines.

Cloud Tooling Engineer

Ford Motor Company

Apr 2022 – Mar 2025

CI/CD & Platform Engineering

- Enhanced and standardized the enterprise OpenShift Pipelines (Tekton) platform to enable scalable CI/CD adoption across engineering teams.
- Led migration of 2000+ CI/CD pipelines during Tekton breaking-change upgrades with minimal disruption to engineering teams.
- Automated OpenShift Pipelines upgrades using ArgoCD and built smoke-test validation frameworks for deployment reliability.
- Managed Cloud Build platform services and contributed to reusable Terraform modules to support automation and new feature enablement.
- Contributed to Spring Boot REST APIs supporting onboarding workflows, access validations, and platform integrations.
- Enabled shared platform services including Astronomer, Elastic, and Dev Spaces by implementing CI/CD pipelines and onboarding capabilities using OpenShift Pipelines in collaboration with internal and vendor teams.

Junior Engineer

Ford Motor Company

Aug 2020 – Mar 2022

Cloud Next Generation Tool SRE

- Supported cloud tooling and SRE operations for internal platform services and operational workflows.
- Developed Python automation scripts supporting monitoring, platform reliability, and maintenance activities.

Awards & Certifications

- **Google Associate Cloud Engineer Certification** Jan 2026 – Jan 2029
- **EPEO Walkathon Innovation Recognition (Ford Motor Company)** 2025 & 2026
Recognized as winner for innovation contributions in organizational technology events.
- **FBS Technovate 2024 – Innovation Recognition (Ford Motor Company)** May 2024
Recognized for showcasing platform engineering and cloud tooling innovation initiatives.

Education

SASTRA Deemed University

B.Tech (Hons.) in Electronics and Communication Engineering

2016 – 2020

CGPA: 8.53 / 10
