

SUPRAJA PATURI

Cloud Tooling Team Lead (Platform Engineering)

+91-8500909271 supripaturi@gmail.com linkedin.com/in/supraja-paturi

Summary

Platform / DevOps Engineer with 5+ years of experience in building scalable CI/CD platforms, cloud infrastructure, and developer self-service tooling. Currently leading Cloud Tooling initiatives focused on platform standardization, automation, and developer experience improvements on OpenShift.

Technical Skills

Cloud & Platform Engineering: GCP, OpenShift, Docker, Terraform, Airflow, DevSpaces, Backstage, Artifact Hub
CI/CD & Automation: OpenShift Pipelines, Tekton, GitOps, ArgoCD, Cloud Build
Programming & Observability : Python, Java, Go, Bash, PowerShell, Prometheus, Grafana, Elastic (ELK), OpenTelemetry

Experience

Cloud Tooling Team Lead

Apr 2025 – Present

Ford Motor Company

Platform Engineering / DevOps

- Leading CI/CD platform engineering and developer self-service initiatives on OpenShift and GCP platforms.
- Driving platform standardization through reusable OpenShift Pipelines, deployment automation, and Kubernetes-based developer workflows.
- Developed Kubernetes-based solutions with deployment controllers, integrated monitoring, logging, alerting, and OpenTelemetry-based observability.
- Built reusable CI/CD pipelines and enabled platform integrations through Artifact Hub and Backstage for centralized onboarding workflows.
- Working on self-service deployment capabilities and automation improvements to enhance developer experience across engineering teams.
- Collaborating with security and artifact management teams to enable keyless authentication for CI/CD pipelines.

Cloud Tooling Engineer

Apr 2022 – Mar 2025

Ford Motor Company

CI/CD & Platform Engineering

- Managed and enhanced OpenShift Pipelines/Tekton for enterprise CI/CD enablement across cloud-native platforms.
- Led migration of 2000+ CI/CD pipelines during Tekton breaking-change upgrades with minimal disruption across engineering teams.
- Automated OpenShift Pipelines upgrades using ArgoCD and built smoke-test validation frameworks for deployment reliability.
- Managed GCP Cloud Build services and Terraform-based infrastructure updates supporting platform scalability.
- Designed and implemented CI/CD pipelines for Airflow and Elastic platform services using OpenShift Pipelines.
- Enabled shared platform services (Elastic, Artifact Hub, DevSpaces) in collaboration with platform and vendor teams.

Junior Engineer

Aug 2020 – Mar 2022

Ford Motor Company

Cloud Next Generation Tool SRE

- Worked on cloud tooling and SRE support activities for internal platform services and operational workflows.
- Developed Python automation scripts supporting monitoring, platform reliability, and maintenance activities.

Awards & Certifications

- **Google Associate Cloud Engineer Certification** Jan 2026 – Jan 2029
- **EPEO Walkathon Innovation Recognition (Ford Motor Company)** 2025 & 2026
Recognized as winner for innovation contributions in organizational technology events.
- **FBS Technovate 2024 – Innovation Recognition (Ford Motor Company)** May 2024
Recognized for showcasing platform engineering and cloud tooling innovation initiatives.

Education

SASTRA Deemed University

2016 – 2020

B.Tech (Hons.) in Electronics and Communication Engineering

CGPA: 8.53 / 10
